

SPACEBED® - Information for Users

SPACEBED® mattress has been specially developed for use in the car, but can be used universally, e.g. for camping and overnight stays in a tent or at home.

When using the SPACEBED® for overnight stays in the car, please always observe the current regulations on road traffic and the local road traffic regulations of the respective country, where you are staying or are traveling.

To achieve maximum satisfaction when using the SPACEBED®, please follow the instructions below:

The SPACEBED® mattress has a removable cover. When manipulating the cover, please make sure that the filling of the mattress or cover is not damaged. The cover is very easy to remove and machine washable, please wash on the back at 30°C, do not spin, do not bleach, do not iron. Clean and wash the cover of the SPACEBED® mattress only with appropriate laundry detergent designed for this purpose. SPACEBED® is of the highest quality, but of course, it is not intended for everyday use. We do not recommend washing the filling of the mattress, just cleaning it regularly with a vacuum cleaner.

Safety note: When traveling, we recommend paying attention to the safety regulations, especially putting on the safety belts in the car when driving and using them properly for your maximum protection. It is not recommended (and may be limited or even prohibited by the respective regulations) to lie on the mattress in the car if the car is moving. Please note that such prohibitions or legal restrictions must be followed.
